

The PCR - Improving MSK
Medicine & Rheumatology

The future of community MSK and social prescribing

PARK INN HOTEL, YORK
22-24th November 2018

An educational programme of lectures and workshops for GPs, trainees and other members of the practice team to help develop core skills in musculoskeletal care.

This year we will also be running the ever-popular Joint Injection Sessions using Thiel-embalmed specimens of the hand, wrist, and the elbow.

Other sessions to be covered:

- Is pain self-management your first choice, or last resort?
- When does foot pain become arthritis?
- NICE Guidelines for SpA - Spondyloarthritis
- Gout - experiences developing an MDT, nurse-led clinic approach in primary care
- Osteoporosis
- Ultrasound
- Choosing Wisely – Shared Decision Making
- Orthopaedic examination and case histories
- Chronic Pain

Lectures:

- Sports Medicine
- Chronic Pain Surgery and use of Opioids
- The new community GPSI MSK Team
